of Chongqing University,
Chongqing Emergency Medical
Center

To Whom It May Concern,

China is the largest diabetic population in the world. The number of diabetes and its complication increase sharply in the past ten years. As the Head of Southwestern Academic Limb Salvage Alliance (SALSA)-China, we are focusing on diabetes and amputation prevention, diabetes education, diabetes and its complication care, et al. I am convinced that the new management technology conceived by Medilync, Cloudlync and Insulync will be useful to diabetic patients in China.

Wish them all the best.

Dr. Wuquan Deng
